

felt peas tutorial

© All images and designs are copyrighted. Please do not sell this pattern but feel free to sell anything you make using this pattern. Thank you.

what you will need

- green felt
- green roving for needle felting
- needle felting needle
- scissors
- glue gun
- embroidery thread

1

- Begin by cutting two identical crescent moon shapes from the green felt approx. 4" long.

2

- Sew the two crescents together along the curved edge.

3

- Flip so seam is now on inside. This will be the pod.

4

- The ends of the pod will stick out so trim them with a pair of scissors.

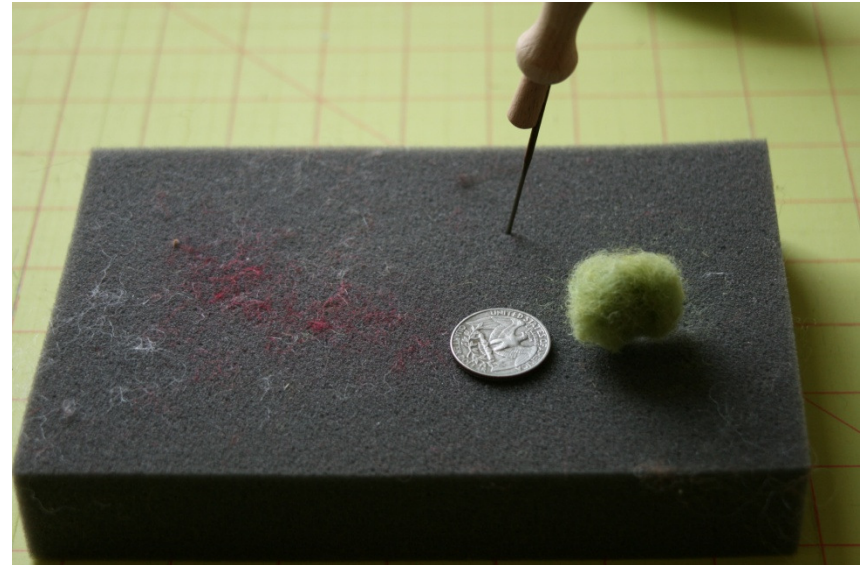

5

- Using green thread, blanket stitch about 1 inch in from both ends. Now your pea pod is finished.

6

- To make your peas, get a ball of roving about the size of a quarter.

7

- Using your needle-felting needle work it down to about the size of a dime. You'll need to make three of these.

8

- Using a pin to hold the felt balls, hot glue around the circumference of the lower half and put the peas into the pod one at a time.

9

- Now you have your peas in a pod.

Happy crafting!
